Teaching Information:

Spring 2026 (NOW): TA for UChicago MATH 23500 Markov Chains, Martingales and Brownian Motion under Stephen Yearwood (https://mathematics.uchicago.edu/people/profile/stephen-yearwood/)

Number of Students: 100

Winter 2026: TA for UChicago MATH 20310 Accelerated Analysis under Daniil Rudenko (https://math.uchicago.edu/~rudenkodaniil/)

Number of Students: 10

The TA/CA or Intern. . .

	Mean	Median
Facilitated discussions that supported your learning.	4.83	5.00
Gave you useful feedback on your work.	4.83	5.00
Stimulated your interest in the core ideas of the class.	4.67	5.00
Challenged you to learn.	4.67	5.00
Helped you succeed in the class.	4.67	5.00
Was available and helpful outside of class.	4.83	5.00
Overall, this individual made a significant contribution to your learning.	4.83	5.00

There were 6 respondents, and this is out of 5.

Reviews:
Katherine Miner was the TA and she held a weekly problem session alongside office hours and did a guest lecture on contraction mapping and cantor intersections. The weekly problem sessions were extremely helpful for going over the main content of the week and having a chance to ask questions and work through some example problems. The guest lecture was also extremely well done and organized well and engaging. She also organized review sessions before the midterm and final which were good ways to understand problem solving strategies and what the tests might look like.

Katherine Miner - absolute goat

Katherine - she was awesome and her review sessions were great

Fall 2025: TA for UChicago MATH 27300 Basic Theory of ODEs under Jiajie Chen (https://jiajiechen94.github.io/)

Number of Students: 22
Number of Responses: 7

Was available and helpful outside of class.	4.86	5.00
Overall, this individual made a significant contribution to your learning.	4.43	5.00

Reviews:
Katie. TA sessions are good

Great TA, with detailed feedback.

Katie Miner. I didn't interact with her that much, but her OH before the midterm was helpful. She was very on top of grading and gave good feedback (also was quite nice). Overall a solid TA.

Katherine Miner. Her review sessions were helpful before exams.

Due to a scheduling conflict, I was not able to attend many of Katie's discussion sections. However, the LaTeX notes and materials she posted on Canvas were very helpful. In particular, her approaches to some problems provided alternative methods that were not fully covered in lecture, which I found insightful.

Reviews:

- Katie hosted a lot of helpful review sessions and was extremely active on [Q&A Forum] while none of the other instructors were. I could never understand the content from lecture, but Katie's teaching saved me. I can confidently say that Katie taught me the entirety of 18.02 and is the only reason I passed this class.
- Katie was such an incredible TA and her impact on everyone is more than visible
- Best TA
- AMAZING RECITATION LEADER. Always explained things very clearly and gave us specific problem solving techniques to tackle problems. Also was very good in helping me gain an intuition for some problems. Katherine would always ask if everyone understood what was happening and was happy to reexplain things in a different way if people were having trouble. She was also very open to staying after recitation so we could ask questions about the pset or on the concepts in general. I also think it's amazing how she help review sessions for the exams.

Reviews
I just wanted to give a shout-out to my undergraduate assistant who helped me in my calculus class. She was always available when I needed help and provided such clear explanations that really helped me understand the material. I feel much more confident in my abilities thanks to her guidance. Thank you so much!
